025023-00001	1	Commercial beekeeper near Frostproof, FL reported unusual number of dead bees. Colonies near orange groves. Each of 80 colonies has had adult bee population reduced by 60% leaving only hive bees. Queens are still laying, so owner expects colonies to recover. Loss of forage bees will prevent production of honey crop. Complainant believes adjacent grower has been careful but others may not have been. Other losses have been attributed to Montana Insecticide. Apiary inspector agreed that losses appeared to be due to pesticide poisoning.
